

Pittsylvania Christian Service Camp

Policies and Procedures

Summer Camp 2021

Notice: Pittsylvania Christian Service Camp must adhere to all guidelines found in EO-79 enforced by the Virginia Department of Health, and use CDC recommendations for “Overnight Summer Camps” at its own discretion. The following policies and procedures reflect practical applications of those recommendations and requirements. This plan is *not* fool proof but acts as guidance that is designed and capable to adapt accordingly to conditions and situations encountered at Camp. These policies and procedures are subject to change in 2021. Pittsylvania Christian Service Camp reserves the right to edit these policies and procedures at any time in 2021.

PPE Masks: All Campers, Volunteers, Visitors, Employees and Non-Camp Personnel ages 5 and older must wear a PPE mask, covering their mouth and nose while on the premises of Pittsylvania Christian Service Camp. Exceptions to this policy include: if any individual *has* been vaccinated; when outdoors; when eating, drinking; exercising; sleeping; swimming; playing a musical instrument or singing; individuals with medical conditions; or when participating in a religious service. Other exceptions to this policy can be found in Executive Order 79.

Camper Packing Checklist: Camp Pitt has a few extra recommendations for your packing list this year: (1). Camp Pitt asks that all campers pack their own PPE mask, as it will be required in various areas at times. (2). We encourage campers to bring their own personal hand sanitizer if they wish. (3). Please pack a water bottle and write your campers name on it. We will be limiting the use of paper cups this summer. (4). If able, please pack a lawn chair with your campers name on it. We will use lawn chairs for outdoor groups and worship time. (5). Please pack your camper’s clothes/toiletries/belongings in a plastic tote. We ask that camper’s dirty clothes are properly bagged and put back in their tote everyday.

Screening Procedures: All campers, volunteers, and staff are required to take temperature checks arriving on site. An acceptable body temperature will range from 97.0 degrees F. to 99.9 degrees F. An unacceptable temperature will be 100.0 degrees F. and over. We have thermal forehead thermometers for temperature checks at Camp. Any person at Camp who’s temperature is (or exceeds) 100.0 degrees F. during a screening will be isolated in our nurse’s designated area, then checked a second time 15-30 minutes later to confirm that person’s fever. Any person with a fever over 100.0 degrees F. or showing consistent symptoms (fever, sore throat, coughing, diarrhea, vomiting, stomachache, severe headache, new loss of smell and taste) will be sent home, or isolated in the nurse’s designated area until parents arrive and that camper is taken home. Other symptoms to be monitored are: chills, nasal congestion or runny nose, shortness of breath or difficulty breathing, tiredness, muscle or body aches, or poor appetite. In addition, Campers, Volunteers, and Staff will have temperature checks and symptom screenings each morning before breakfast.

Policies and Procedures

Summer Camp 2021

Visits and Non-Camp Personnel

All visitors and non-camp personnel must wear a PPE mask covering their mouth and nose while on the premises of Pittsylvania Christian Service Camp. We are only allowing visitors who have a "Special Circumstance" to make camp visits. We consider special circumstances to be: pickup for sports practice, doctor's appointments, and/or campers who need something from home. Personal visits are not allowed. Please contact the Camp Pitt office if you have a special circumstance.

Hand Hygiene Procedure

Pittsylvania Christian Service Camp will be implementing a "Wash-in/Wash-out" plan. Campers, volunteers and staff will be required to wash their hands at a designated hand washing stations before and after any activity in their schedule.

Covid-19 Case Action Plan: Campers, Volunteers, and Staff will have temperature checks and symptom screenings each morning before breakfast. Any temperature over 100.0 will be checked a second time 15-30 minutes later for confirmation. Any person with a fever over 100.0 or showing any symptoms (fever, sore throat, coughing, diarrhea, vomiting, headaches, loss of smell and taste) will be sent home, or isolated in the nurse's station until parents arrive and that camper is taken home. That employee, volunteer, or parent of camper will be asked to be tested at a local hospital or doctor's office within the next 24 hours. Employees, volunteers, and parents must acknowledge Camp Pitt's Covid-19 Case Action Plan is not full proof, and accept the terms and conditions of participating in camp through our liability form before attending Camp Pitt.
